

Eurasia Foundation of Central Asia (EFCA) – Tajikistan is committed to activating the potential of civil society and its institutions to contribute to national and regional development in the areas of climate change and rural resilience, gender equality and women's empowerment, anti-radicalization and conflict prevention, civil society development and good governance, youth empowerment and education, rule of law and anti-corruption, and also improves distance learning system.

Our unique and extensive experience in coordinating and cooperating with government at the national, regional, and local level in all parts of the country for program implementation purposes, allows us to run programs that are both relevant and viable in the context of Tajikistan and beyond.

In working towards Sustainable Development Goals, we have a proven track record in achieving the highest standard in development work in Tajikistan and the Central Asian region by collaborating closely with different stakeholders and partners and for numerous international donors such as the World Bank, IFC, the United Nations, DFID, as well as the governments of Denmark, the United Kingdom, the Netherlands, New Zealand, Norway, Finland, Germany, the United States and Tajikistan.

In order to achieve these goals, the EFCA Tajikistan in cooperation with the Branch of the German Caritas Association in the Republic of Tajikistan *launched a distance learning platform for social work* www.farofir.tj within the BMZ Project P.345-2017-001 “Enhancing Vocational Training System and Previously Established Structures in Community Based Rehabilitation in Tajikistan”

Following activities were implemented within the framework of the project:

- Development of a distance learning platform for social work;
- Development of distance learning website for “State Agency for Medical and Social Expertise of Disabled Persons” (SAMSEDP);
- Promoting and publishing the web site for distance learning on social work;

Learning platform for social work is relevant and take care of the current situation with the COVID-19 virus in the world and particular in Tajikistan. Major advantages of the platforms are as follows:

- Developed platform adopted and tailored for local conditions
- Solves problems related to the slow internet in the country
- No any charges in case of use of services local internet providers
- Platform developed locally by IT specialists and does not have subscription fees or any related costs
